

FOR IMMEDIATE RELEASE:

BLACKSTONE-NEY ULTRASONICS INTRODUCES NEW CLEANING SOLUTIONS AT NASF SUR/FIN 2017

June 9, 2017 – Cincinnati, OH

Blackstone-NEY Ultrasonics, a world leader in providing cleaning and waste minimization technologies, will introduce a host of advanced cleaning solutions at the NASF Sur/Fin in Atlanta, Georgia June 19 - 21, 2017. Visitors to Blackstone-NEY Ultrasonics Booth #722 will be introducing several new products, technologies and services. Among the new technologies exhibited at the show will be:

- **AgiSonic® Ultrasonic Parts Washer Cleaning System** (also known as the “WashMaster & Grease Monkey Plus™”) is robust line of ultrasonic cleaning systems designed for heavy duty parts washing with vertical parts agitation and up to 21 watts per gallon/5.4 watts per liter of 40 kHz ultrasonics.

The AgiSonic parts washer is so versatile; it can be found operating in the harshest industrial environment and in the most demanding medical clean rooms.

- **PROHT Sonic Tank:** Ultrasonic cleaning tanks and housings are constructed of stainless steel with a Duplex Stainless transducer radiating surface to significantly extend transducer life. PROHT tanks are available in sizes ranging from 12” by 6” through 36” by 24” and offer the same cleaning capabilities as more elaborate systems at a lower price. They are ideal for laboratory as well as entry-level through small scale production cleaning. The compact design fits easily on a workbench or can be installed as a bench top drop-in. A digital ultrasonic timer and temperature control are standard features of the new PROHT design.

We will have technical experts available at the show to explain our technologies more in-depth and to provide suggestions to our customers for improving their cleaning processes.
