FOR IMMEDIATE RELEASE:

Cleaning Technologies Group, LLC introduces new cleaning solutions at Eastec 2015

March 2015 – Cincinnati, OH

Cleaning Technologies Group a world leader in providing cleaning and waste minimization technologies will introduce a host of advanced cleaning solutions at the Eastec 2015 in West Springfield, Massachusetts May 12 - 14, 2015. Visitors to Cleaning Technologies Group Booth #3350 will be introduced to a number of new products, technologies and services. Among the new technologies exhibited at the show will be:

- **The New LeanJet® RB-1 Cleaning System** uses a patented washing and rinsing process of agitation, spray impingement, hydraulic purging through immersion and rotation, ultrasonics, and heated blow-off drying. The patented "triple action" batch cleaning process was developed specifically to process a broad range of challenging parts, especially those with internal bores and passages and complex geometries, making this system capable of meeting critical cleaning expectations. . The new RB-1 has many enhancements for easy maintenance such as larger access doors, larger tank access lids, bolt on air knife and more. The new RB-1 has a small foot print of 4ft. wide x 7ft. deep x 6.6 ft. height.

The new LeanJet RB-1 Gen 3 parts washer also features the latest Siemens programmable controller and operator interface screen. This controls platform boosts system flexibility for automation integration, process control and data logging

- **The New Blackstone~NEY Ultrasonics Modular Aquarius® Cleaning System** is an innovation in aqueous parts cleaning, offering a modular plug & play configuration Multi-Tank Cleaning System. The Modular Aquarius is characterized by individual modules that can easily be integrated together to offer maximum flexibility to the end user. Standard wash and rinse stages can be mated to provide exactly the cleaning system required for today's application. The Modular Aquarius comes standard with three frequencies 40, 72, 104 kHz in each tank, Siemens controller, automated hoist transfer system and much more. Additional modules can be added at any time allowing for future expandability. while offering an intuitive user interface

At the show we will have technical experts available to explain our technologies in more depth and provide suggestions to our customers to improve their cleaning processes.
