

Ransohoff, Inc. Introduces "PRO-SEP Ultra" Parts Washer Recycling System

The patent pending **PRO-SEP Ultra** unit is a fully integrated, point of use aqueous parts washer recycling system that's designed to significantly extend cleaning solution life and greatly minimize solution haul-away and machine maintenance expense while ensuring optimal performance in part cleanliness quality and consistency.

The **PRO-SEP Ultra** has a highly effective free oil control and removal capability and an optimally integrated innovative ultrafiltration membrane for emulsified oil and fine particulate removal. Also included is an in-line reverse osmosis (R/O) membrane which provides R/O quality water for make-up to the parts cleaning system which further enhances this process.
