FOR IMMEDIATE RELEASE:**RANSOHOFF UNVEILS INDUSTRY-LEADING ENERGY EFFICIENT
CONTINUOUS STRIP CLEANING SYSTEM**

Cincinnati, OH – June 2025

Ransohoff, a division of Cleaning Technologies Group, proudly introduces the Continuous Strip System, the most energy-efficient strip cleaning solution on the market today. Purpose-built for lean manufacturing environments, this innovative washer delivers superior cleaning performance through a practical, customer-driven design.

Developed with direct input from key customers and leveraging the success of previous models, the Continuous Strip System sets a new standard in operational efficiency and maintenance accessibility.

Optimized for Performance and Efficiency

Each stage of the washer is fully insulated and features independently adjustable exhaust dampers, significantly reducing system heat loss. Its low-profile housing allows for quick and easy internal access, while also offering operators an unobstructed line of sight across the machine.

Engineered for Tough Industrial Demands

Constructed entirely from stainless steel, the Continuous Strip System is built to withstand the harshest industrial environments, delivering years of reliable, low-maintenance service. Specifically designed for processing continuous strips of steel, the system excels at removing mill oils and loose scale.

Designed for Usability and Longevity

Combining flexibility, durability, simplicity, and ease of maintenance, this strip cleaning system is tailored to meet the evolving needs of modern manufacturing. As with all Ransohoff systems, it comes backed by the industry-trusted Ransohoff 3-2-1 Warranty.
