## **RANSOHOFF LAUNCHES THE WASHMASTER MD-12 COMPACT POWER, MAXIMUM PERFORMANCE**

Cincinnati, OH – July 2025

Ransohoff, a division of Cleaning Technologies Group and a leader in precision cleaning solutions, proudly announces the launch of the Washmaster MD-12 (Mini Drum)—a compact yet powerful parts washer built with durability and innovation synonymous with the Ransohoff name.

Engineered with a stainless-steel tank, drum, and housing, the MD-12 showcases Ransohoff's renowned construction quality. Its innovative cleaning process combines full immersion and spray cleaning, offering superior cleaning results while dramatically reducing energy losses commonly associated with traditional spray-only systems. This hybrid method also minimizes chemical usage, contributing to both environmental sustainability and cost efficiency.

A standout feature of the MD-12 is its integrated forced air-drying system, which ensures fast, efficient drying of parts before discharge—streamlining throughput and improving process reliability.

Designed with the end-user in mind, the MD-12 provides easy access for quick and safe drum inspection, cleaning, and maintenance, helping reduce downtime and extend machine life. In addition, enhanced oil control technology significantly improves bath life, further decreasing maintenance requirements and operating costs.

"The MD-12 represents a step forward in compact cleaning systems," said Jeff Mills, VP Sales & Marketing at Ransohoff. "With this release, we're offering our customers a solution that delivers high-performance cleaning in a smaller footprint—without compromising durability or efficiency."

The Washmaster MD-12 is covered by Ransohoff's industry-leading 3-2-1 Warranty:

3 years on parts

2 years on labor

1 year on travel expenses

Experience unmatched reliability and cleaning precision with the Washmaster MD-12—designed for performance, built to last.
